## IoT Analytics – Power Your Operations with Data

An all-in-one, turnkey IoT analytics platform hosted on our secure cloud. Just log in to access real-time insights and operational efficiency for your industrial machines.

### Features:

- **Comprehensive Reporting/Dashboards:** Visualize key metrics and trends to make informed decisions.
- **Real-time Alerts:** Receive instant notifications via text or email to address issues as they happen.
- **AI-Powered Predictive Maintenance:** Utilize artificial intelligence to forecast equipment failures and maintenance needs, preventing costly breakdowns.
- **Long-term Data Storage:** Securely store your data for large scale historical analysis and prepped for an AI future.
- **On-Site Backups/Store and Forward:** Maintain local data copies to ensure uninterrupted access, even in case of network issues.
- **Custom Gateways:** Tailor the system to your unique devices and operational needs for seamless integration.
- **Turnkey Solution:** Fully hosted on our cloud, allowing clients to simply log in and start using without any setup hassles.

### Business Value:

- **Reduce Machine Downtime:** Detect and address equipment issues before they escalate, minimizing costly interruptions.
- **Transform Data into an Asset:** Leverage collected data to gain insights that drive strategic business decisions.
- **Gain Operational Insights:** Monitor performance in real-time, optimizing processes for better efficiency.
- **Enhance Equipment Insights:** Use historical data to predict maintenance needs and extend machinery lifespan.
- **Customization & Scalability:** Adapt to your evolving business requirements, ensuring long-term value.

### Pricing:

- **Per Device Pricing:** Flexible pricing model tailored to the number of devices connected.
